

# Template Week 7 – Host your website on GitHub

Student number: 589020

**Domain name (URL) of your website on GitHub:**

<https://lucasofzo.github.io/ItFundamentalsLucasBourgonje.github.io/>

**Relevant screenshots + motivation:**

The screenshot shows a GitHub repository page for 'lucasofzo/ItFundamentalsLucasBourgonje.github.io'. At the top, there's a 'Quick setup — if you've done this kind of thing before' section with options for HTTPS, SSH, and a copy link. Below it, instructions say to get started by creating a new file or uploading an existing file, and to include a README, LICENSE, and .gitignore. The main content area displays deployment information: 'Your site is live at <https://lucasofzo.github.io/>' followed by the repository name 'ItFundamentalsLucasBourgonje.github.io/'. It also shows 'Last deployed by lucasofzo 4 minutes ago'. At the bottom are two buttons: 'Visit site' and 'Unpublish site'.

Ready? Save this file and export it as a pdf file with the name: [week7.pdf](#)
